INTERNATIONAL PRELIMINARY EXAMINATION REPORT

International application No.

PCT/EP 03/50783

 Basis of the 	repor	ŧ
----------------------------------	-------	---

 With regard to the elements of the international application (Replacement sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to in this report as "originally filed" and are not annexed to this report since they do not contain amendments (Rules 70.16 and 70.17)):

	Description, Pages						
	1-64		as originally filed				
	1-	20	as originally filed				
2	. W la	. With regard to the language, all the elements marked above were available or furnished to this Authority in language in which the international application was filed, unless otherwise indicated under this item.					
	These elements were available or furnished to this Authority in the following language: , which is:						
		the language of a tr	anslation furnished for the purposes of the international search (under Rule 23.1(b)).				
		the language of pur	blication of the international application (under Rule 48.3(b))				
		the language of a tr Rule 55.2 and/or 55	anslation furnished for the number of the second				
3.	 With regard to any nucleotide and/or amino acid sequence disclosed in the international application, the international preliminary examination was carried out on the basis of the sequence listing: 						
			rnational application in written form.				
		filed together with th	e international application in computer readable form.				
		furnished subsequently to this Authority in written form.					
		furnished subsequer	ntly to this Authority in computer readable form.				
	The statement that the subsequently furnished written sequence listing does not go beyond the in the international application as filed has been furnished.						
4.	The amendments have resulted in the cancellation of:						
		the description,	pages:				
		the claims,	Nos.:				
		the drawings,	sheets:				
5.		This report has been been considered to g	established as if (some of) the amendments had not been made, since they have o beyond the disclosure as filed (Rule 70.2(c)).				
			eet containing such amendments must be referred to under item 1 and annexed to this				
6.	Additional observations, if necessary:						

INTERNATIONAL PRELIMINARY EXAMINATION REPORT

International application No.

PCT/EP 03/50783

11	l. No	n-establishment of opinion	with re	gard to nov	elty, inventive step and industrial applicability
	The questions whether the claimed invention appears to be novel, to involve an inventive step (to be non-obvious), or to be industrially applicable have not been examined in respect of:				
		the entire international applic	ation,		
		claims Nos. 20 (Industrial Ap	plicabi	lity)	
		because:			
	×	the said international applica does not require an internation	tion, or onal pre	the said clai	ims Nos. 20 relate to the following subject matter which amination (specify):
		see separate sheet			
		the description, claims or dra that no meaningful opinion co	wings ould be	(indicate part formed (spe	ticular elements below) or said claims Nos. are so unclear
		the claims, or said claims No could be formed.	s. are s	so inadequat	ely supported by the description that no meaningful opinion
		no international search report	t has b	een establish	ned for the said claims Nos.
2.	 A meaningful international preliminary examination cannot be carried out due to the failure of the nucleotide a or amino acid sequence listing to comply with the standard provided for in Annex C of the Administrative Instructions: 				
		the written form has not been	furnisl	ned or does i	not comply with the Standard.
		•			ned or does not comply with the Standard.
٧.	Rea cita	soned statement under Articitions and explanations supp	cle 35(porting	2) with rega such stater	rd to novelty, inventive step or industrial applicability;

International application No. PCT/EP 03/50783

EXAMINATION REPORT - SEPARATE SHEET

III NON-ESTABLISHMENT

Claim 20 relates to subject-matter considered by this Authority to be covered by the provisions of Rule 67.1(iv) PCT. Consequently, no opinion will be formulated with respect to the industrial applicability of the subject-matter of these claims (Article 34(4)(a)(I) PCT).

V REASONED STATEMENT

PRIOR ART

The documents cited in the International Search Report

D1: US-A-5 767 139 (FINN PAUL WILLIAM ET AL) 16 June 1998 (1998-06-16)

D2: DE 25 59 211 A (MCNEILAB INC) 8 July 1976 (1976-07-08)

have been considered for the examination procedure.

D3: WO 03/064387 A (HOFFMANN LA ROCHE) 7 August 2003 (2003-08-07) will be relevant in the regional phase. The applicant's comments will be taken into consideration.

2. NOVELTY

The presently claimed subject matter differs from D1 (see formula I of claim 1) and D2 (see formula (I),claims) in the nature of the substituent in position 3. Therefore the requirements of Article 33(2) PCT are fulfilled.

3. INVENTIVE STEP

The problem of the present application may be seen in the provision of further indole derivatives with high affinity for the androgen receptor.

D1 is considered to represent the closest prior art since the compounds being described therein exhibit a similar pharmaceutical activity.

INTERNATIONAL PRELIMINARY

EXAMINATION REPORT - SEPARATE SHEET

Due to the structural difference as lined out under item 2 the skilled person would not have taken into consideration the presently claimed structures in order to solve the given problem.

The scope of the claims seems to represent a reasonable generalisation of the tested examples.

Therefore the requirements of Article 33(3) PCT are fulfilled.

4. INDUSTRIAL APPLICABILITY

For the assessment of the present Claims 16-20 on the question whether they are industrially applicable, no unified criteria exist in the PCT Contracting States. The patentability can also be dependent upon the formulation of the claims. The EPO, for example, does not recognize as industrially applicable the subject-matter of claims to the use of a compound in medical treatment, but may allow, however, claims to a known compound for first use in medical treatment and the use of such a compound for the manufacture of a medicament for a new medical treatment.
